

WATT'S HAPPENING

SCENIC RIVERS ENERGY COOPERATIVE
LANCASTER, DARLINGTON AND GAYS MILLS, WISCONSIN

DEADLINE QUICKLY APPROACHING

Youth Leadership Congress

UW-River Falls | July 24-26, 2019

The annual **WECA Youth Leadership Congress** is a dynamic three-day event for youth leaders across Wisconsin to develop their **leadership skills** while learning about the purpose, operation, and scope of **cooperative businesses**.

Take the opportunity to...

- See **what makes the cooperative business model different and successful**, then apply this knowledge to fun and challenging cooperative activities.
- Identify and learn how to develop your own **leadership skills**.
- Discuss **cooperative careers** with industry professionals.
- Be **entertained and challenged** by highly acclaimed motivational speakers who understand teens and talk about topics that are relevant in your life.

This is a **by-teens, for-teens cooperative leadership conference** that is planned and developed by a youth board elected at the previous year's event.

Who should apply?

- High school students with a parent or grandparent who is a member of Scenic Rivers Energy Cooperative.
- Students active in their school and community.

What does it cost?

- All registration costs are covered by Scenic Rivers Energy Cooperative and the National Rural Utilities Cooperative Finance Corporation.
- Visit our website - www.sre.coop to complete and return an application today.

DEADLINE FOR APPLICATIONS IS MONDAY, JUNE 14, 2019

Call for more information - 800-236-2141 x554 or email jmartin@srec.net

Unplug to be More Connected

“Almost everything will work again if you unplug it for a few minutes, including you.” Author Anne Lamott cleverly captures the benefits of unplugging in today’s device-driven, multi-tasking world. Keeping up with work, family and school activities or the latest trends on social media makes most of us feel compelled to constantly check our devices.

Summer is a great time to take a family vacation, but it’s also a good opportunity to unplug from our devices and enjoy the great outdoors with family and friends. Research has shown that we all need downtime after a busy day to recharge—even though we may resist it. Take a moment to slow down and enjoy some peaceful hours away from technology.

While you’re unplugging from your devices, take a look around your home to identify electronics that consume energy even when they are not in use (this is known as “vampire” energy loss). TVs, gaming consoles, phone chargers and computers are some of the biggest culprits.

If your summer plans include a staycation, take time to recharge your relationships and be more present with those you love. Stop by one of the dairy breakfasts in either Crawford, Grant, or Lafayette Counties (hosted by SREC members), or hike in one of our area’s parks. Enjoy our beautiful surroundings with your family and friends.

Speaking of spending time outdoors, you can also enjoy energy savings by incorporating LED products and fixtures for outdoor use, such as pathway, step and porch lights. Many include features like automatic

daylight shut-off and motion sensors. You can also find solar-powered lighting for outdoor spaces.

Save energy by keeping warm summer air outside where it belongs. Add caulk or weather stripping to seal air leaks around doors and windows. You can also employ a programmable thermostat to adjust the settings a few degrees higher when no one is home.

In our connected world, we have forgotten how to slow down. We multitask and text. We check email, then voicemail, then Facebook. Do yourself and your family a favor. Put down the device and smell the fresh air.

While Scenic Rivers Energy Cooperative can’t help you recharge your relationships, we can help you save money and energy by connecting you with our energy-saving programs and services. When you do plug back in, we’re just a call or click away.

Tips for Maintaining an Efficient HVAC System

Ah, summer. Cookouts, swimming pools, camping—it's the perfect time to enjoy the outdoors with family and friends. And when it's time to come back indoors, there's nothing better than that cool blast you feel from your home's air conditioning unit.

Your heating, ventilating and air conditioning (HVAC) system is essential to keeping your home comfortable during summer months, and if it breaks down, it's also the most expensive equipment to repair or replace. Luckily, there are simple steps you can take to lengthen the life of your HVAC system.

Change or clean filters. Dirty filters block airflow, which can greatly decrease the efficiency of your system. The Department of Energy recommends changing or cleaning filters every month or two during the cooling season. If your unit is in constant use or is subjected to dusty conditions or pet hair, consider checking filters more frequently.

Clean the HVAC unit. Outdoor condenser coils can become clogged with pollen, dirt and small debris. Use a hose to spray the HVAC unit once each season to ensure maximum airflow. (Warning: Do not use

a pressure washer to do this, as it can damage the equipment.)

Clear space around the HVAC unit. Dryer vents, falling leaves and grass left behind from the lawnmower can create buildup. Remove any debris around the HVAC unit. If you have foliage near the unit, trim it back at least 2 ft. around the condenser to increase airflow.

If you want to evaluate the efficiency of your HVAC system, follow the steps in the graphic shown below.

You should also have your HVAC system periodically inspected by a licensed professional. The frequency of inspections depends on the age of your unit, but the Department of Energy recommends scheduling tune-ups during the spring and fall, when contractors aren't as busy.

When HVAC equipment fails, it's inconvenient and uncomfortable—especially during the dog days of summer. Remember, your HVAC system runs best when it's regularly cleaned and serviced. With a little maintenance along the way, you can add years to your system's lifespan.

3-Step HVAC Test

As summer temperatures rise, so do electric bills. Follow these steps to test the efficiency of your HVAC unit.

The outdoor temperature should be above 80 degrees, and you should set your thermostat well below the room temperature to ensure the system runs long enough for this test.

1. Using a digital probe thermometer (about \$12), measure the temperature of the air being pulled into your HVAC filter.
2. Measure the temperature of the air blowing out of your A/C vent.
3. Subtract the A/C vent temperature from the HVAC filter temperature. You should see a difference of about 17 to 20 degrees. If the difference is less than 17 degrees, you may need a licensed technician to check the coolant. If the difference is greater than 20 degrees, your ductwork may need to be inspected for airflow restrictions.

2019 Member Photo Contest

"Rural Wisconsin"

Scenic Rivers Energy Cooperative is holding its annual photo contest for members' photos to be featured in our 2020 calendar. Winning photos may be used in future newsletters or cooperative publications.

Photos must be taken within the Scenic Rivers Energy Cooperative service area and should capture life in rural Wisconsin (seasons, wildlife, landscape, etc.).

Photos must be submitted via email to jmartin@srec.net.

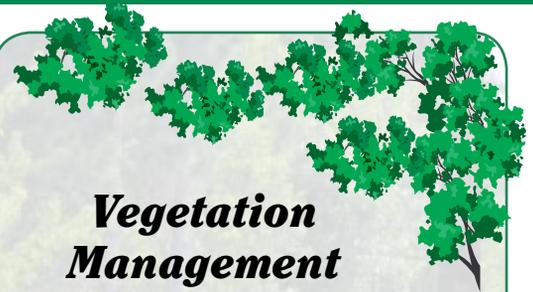

For a complete list of rules and criteria as well as downloadable forms, visit our website, www.sre.coop. Entry forms can also be picked up at our office, or we will email a copy to you.

Badgerland Utility Solutions LLC will be completing the underground inspections in Crawford County. They will be treating woody plant tops and roots with an environmentally sound herbicide starting in the month of June, weather permitting. We will be sending out a postcard within the next weeks notifying affected members who are served by the following Substations: Prairie du Chien and Steuben Substations in Crawford County; and Castle Rock, Jerrett and Kaiser Substations in Grant County.

Energy Efficiency Tip of the Month

Want to light up your outdoor space without increasing your energy use? Try outdoor solar lights! They're easy to install and virtually maintenance free. Remember, solar lights work best when the solar cells receive the manufacturer's recommended hours of sunlight.

Vegetation Management

Zielie's Tree Service will continue trimming on the Gays Mills Substation west circuit the month of June.

It is important for SREC to maintain its rights-of-way for the following reasons:

- Accessibility for field crews, vehicles and equipment
- Fire prevention
- Reliable electric service
- Quality service with the reduction of outages and blinks
- Safety for workers and the public
- Meeting state and federal code requirements

On a daily basis, SREC employees and contractors are working throughout the area, at times on your property, to operate and maintain the electric system and our rights-of-ways. We appreciate your cooperation. If you have questions, please contact Jay at jgardner@srec.net or call 800-236-2141 ext. 566.

WATT'S HAPPENING

Watt's Happening is published monthly as an information service to the member-owners of Scenic Rivers Energy Cooperative.

Any questions or comments can be directed to *Watt's Happening*, Scenic Rivers Energy Cooperative, 231 North Sheridan, Lancaster, WI 53813 or telephone (608) 723-2121 or toll free 800-236-2141.
